Experienced Java Backend Developer with 6 years of building scalable microservices, secure payment integrations, and high-performance batch and event-driven systems. Strong hands-on expertise in Java, Spring Boot, Kafka, Camel, and AWS, with a proven track record of delivering reliable, enterprise-grade solutions across Banking, and Travel domains. AWS Certified Cloud Practitioner, focused on clean architecture, performance optimization, and end-to-end delivery in Agile environments.

PROFESSIONAL SUMMARY

- Delivered robust enterprise solutions leveraging 6 years of experience in Java development.
- Achieved AWS Certified Cloud Practitioner status, demonstrating strong cloud fundamentals and best practices.
- Optimized application performance through advanced use of Collections Framework, Stream API, and Exception Handling.
- Implemented scalable, object-oriented business applications using Java and Spring Boot, improving system reliability and maintainability.
- Implemented resilient microservices architectures using Spring Boot, delivering high scalability, availability, and fault tolerance for enterprise applications.
- Implemented real-time messaging and routing systems using Apache Kafka and Apache Camel, improving data flow efficiency.
- Developed efficient batch processing systems with Spring Batch, reducing data processing time significantly.
- Integrated secure payment gateway solutions, enhancing transaction reliability and user experience.
- Built and consumed RESTful APIs to enable seamless integration across distributed systems.
- Streamlined build and deployment processes using Maven and Gradle, reducing release cycle time.
- Collaborated in Agile teams, driving iterative development and continuous delivery for faster product releases.

WORK EXPERIENCE

- I worked as a Consultant in **Genpact India,** Bangalore from **March of 2020.**
- I am currently working as a Cloud Engineering Specialist in **LTM**, Bhubaneswar from **August 2022.**

EDUCATION

- **B. Tech** in **2016** from **Nalanda Institute of Technology, Bhubaneswar (Odisha)**

PROFESSIONAL CERTIFICATIONS / TRAININGS

- AWS Cloud Practitioner Certificate •
Trained in GitHub Copilot IDE Plugin •
Trained Generative AI Development

TECHNICAL SKILLS

Domain	Banking, Travel & Hospitality
Programming Languages	Java, SQL
Frameworks	**Spring Framework, String Boot and Hibernate**
DB Client Tool	**MySQL Workbench, SQL Management Studio, Oracle SQL Developer. pgAdmin, NoSQL Workbench**
Databases	**DynamoDB, Oracle, SQL Server, PostgreSQL, and MySQL**
Version Control Tools	**Bitbucket, GitHub, GitLab**
Unit Testing Frameworks	Junit, Wiremock
Observability / logs	Splunk, Elastic stack (ELK)
IDEs	Eclipse, STS, IntelliJ, KIRO
Build Tools	Maven, Gradle
CI/CD	Azure DevOps, and Jenkins
Agile Scrum Tools	**Jira, MS Azure DevOps Server**
Project/Bug Tracking Tools	Redmine, Jira
Operating system	Windows, Unix/Linux, Mac
Containerization tools	Docker
Distributed Technologies	Microservices architecture, Event-Driven Systems (Apache Kafka), Integration Frameworks (Apache Camel), Batch Processing (Spring Batch), RESTful APIs
Cloud Platform	AWS (Certified Cloud Practitioner)

WORK EXPERIENCE

Project 1

Project Name	ENTERPRISE PAYMENT SYSTEM	**Team Size**	12
Client	**An Aviation Corp.**		
Start Date	Sep 2023	**End Date**	Jan 2026
Project Description	Payment orchestration for an aviation enterprise handling all transactions like charges, refunds, captures, etc. It includes a vast number of payment gateways and alternative payment methods. It backs the ticketing UI with secure, scalable payment solution.		
Role & Contribution	• Implemented multiple payment gateways like VISA, Checkout, ContactPay, DPO, TABBY. • Worked on maintaining other gateways like Mastercard, American Express (Amex), etc. • Delivering request and response patterns to testing team and UI team Restful Services end points. • Implemented cryptography for API payload protection. • Resolved SonarQube to mitigate vulnerability and code smells.		
Technology &Tools	Java, Spring Boot, Apache Camel, BouncyCastle		

Project 2

Project Name	ENTERPRISE DOC HUB	**Team Size**	5
Client	**An Aviation Corp.**		
Start Date	July 2023	**End Date**	Jan 2026
Project Description	Document processing platform consisting of four granular applications. This application receives financial files from multiple banks and various other payment systems and processes the financial data, validates everything and generates new files to be consumed by other in-house applications. It receives files from sources like SFTP, SMTP servers and stores processed data in AWS S3 and on-prem database.		
Role & Contribution	• Implemented parsing for PDF, XLSX, CSV, TXT, HTML. • Built validation, exception handling, scheduler/file listener jobs. • Implemented backup jobs, missing-file triggers. • Applied Builder and Factory design patterns for file parsers.		
Technology &Tools	Java, Spring Boot, Spring Data JPA,AWS S3, Apache POI, OpenCsv, Zip4j, PDFBox, Jsoup		

Project 3

Project Name	EPS REPORTS	**Team Size**	5
Client	**An Aviation Corp.**		
Start Date	May 2023	**End Date**	Jan 2026
Project Description	Generates daily/weekly consolidated **capture** and **transaction** reports across FOPs (Forms of Payment) and APMs, emails stakeholders.		
Role & Contribution	• Implemented reports for multiple FOPs and APMs and supported ongoing maintenance/debugging.		
Technology & Tools	Java, Spring Boot, Spring Data JPA, OpenCsv, Apache Camel		

Project 4

Project Name	IN FLIGHT CATERING	**Team Size**	9
Client	**An Aviation Corp.**		
Start Date	Aug 2022	**End Date**	Apr 2023
Project Description	It manages in-flight catering via a network of third-party partners and suppliers at various airports rather than operating a single, in-house solution. Its approach is designed to be flexible, offering different meal options based on ticket type, flight duration, and destination. It produces daily, weekly and monthly reports on vendors and consumption.		
Role & Contribution	• Involved in Code Enhancement and Bug Fixing • Involved in developing web services using Spring Boot Rest Services		
Technology & Tools	Java, Spring Boot, Spring Data JPA		

Project 5

Project Name	PARIS	**Team Size**	12
Client	**An Investment Bank**		
Start Date	March 2020	**End Date**	July 2022
Project Description	Suite of six applications generating 23 vendor-consumed reports from daily market data feeds. It validates, reconciles with reference data and transforms into standardized outputs.		
Role & Contribution	• Built and maintained applications using **Spring Boot** and **Spring Data JPA**. • Designed **Spring Batch** jobs for multi-feed processing, tuned performance. • Improved **batch job performance** through tuning and optimization techniques. • Designed and implemented **file watchers** to trigger jobs upon file creation. • Configured **CRON-based schedulers** and developed **dynamic scheduling** to handle daylight saving adjustments. • Added **DB polling** for near-real-time processing. • Redesigned critical data feeds for accuracy and throughput. • Created reusable **utilities** leveraged across six apps. • Supported deployments for smooth releases.		
Technology & Tools	Java, Spring Boot, Gradle, Spring Batch, Jenkins, Docker, Apache Kafka, etc..		

PERSONAL DETAILS

Gender : Male

Marital Status : Single

Languages : English, Hindi, Odia

DECLARATION

I hereby declare that all information furnished by me is true to the best of my knowledge.
